Mission

Core interests

Emerging Technologies

- Artificial Intelligence / Machine Learning
- Digital Twins
- Edge/IoT
- Quantum

Industry Applications

- Agritech
- Future of Work/Digital Transformation
- Greentech
- Smart Cities / Proptech

Cybersecurity

Where I've been

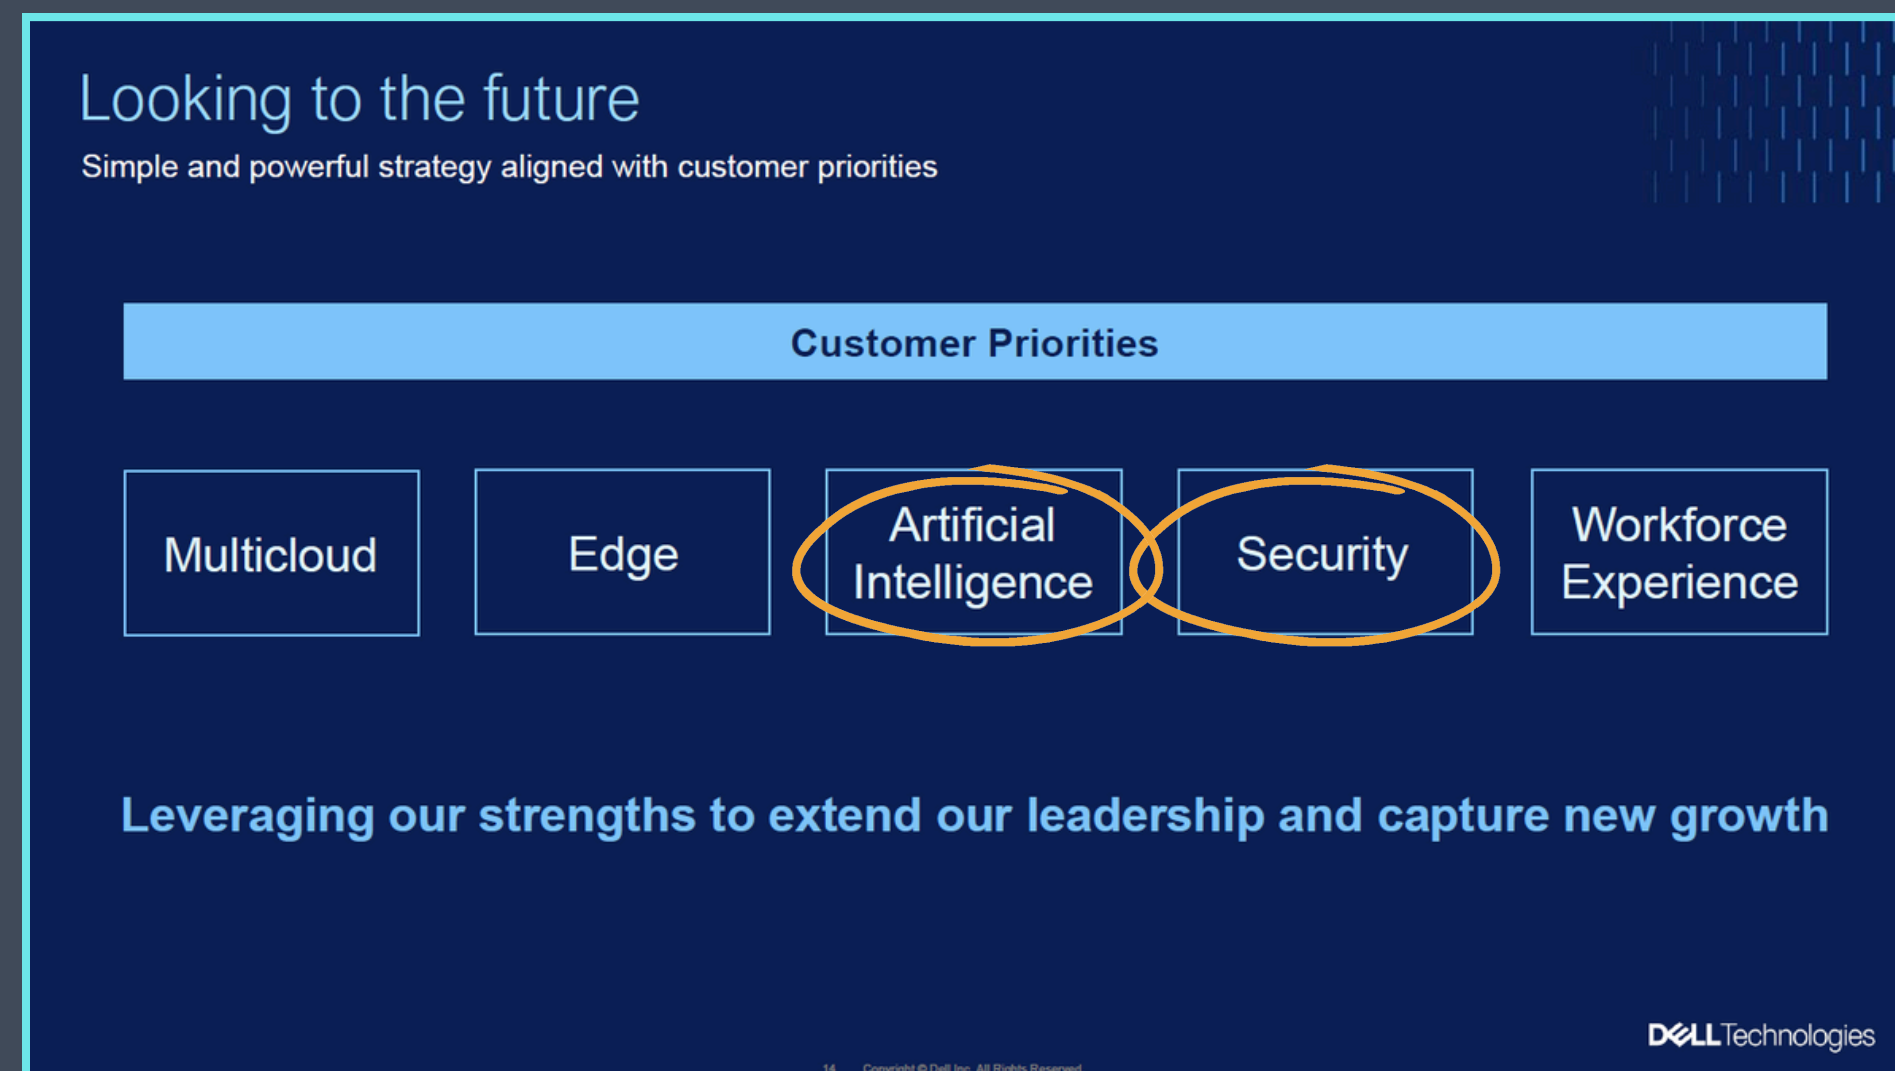

PARLIAMENT | PARLEMENT
CANADA

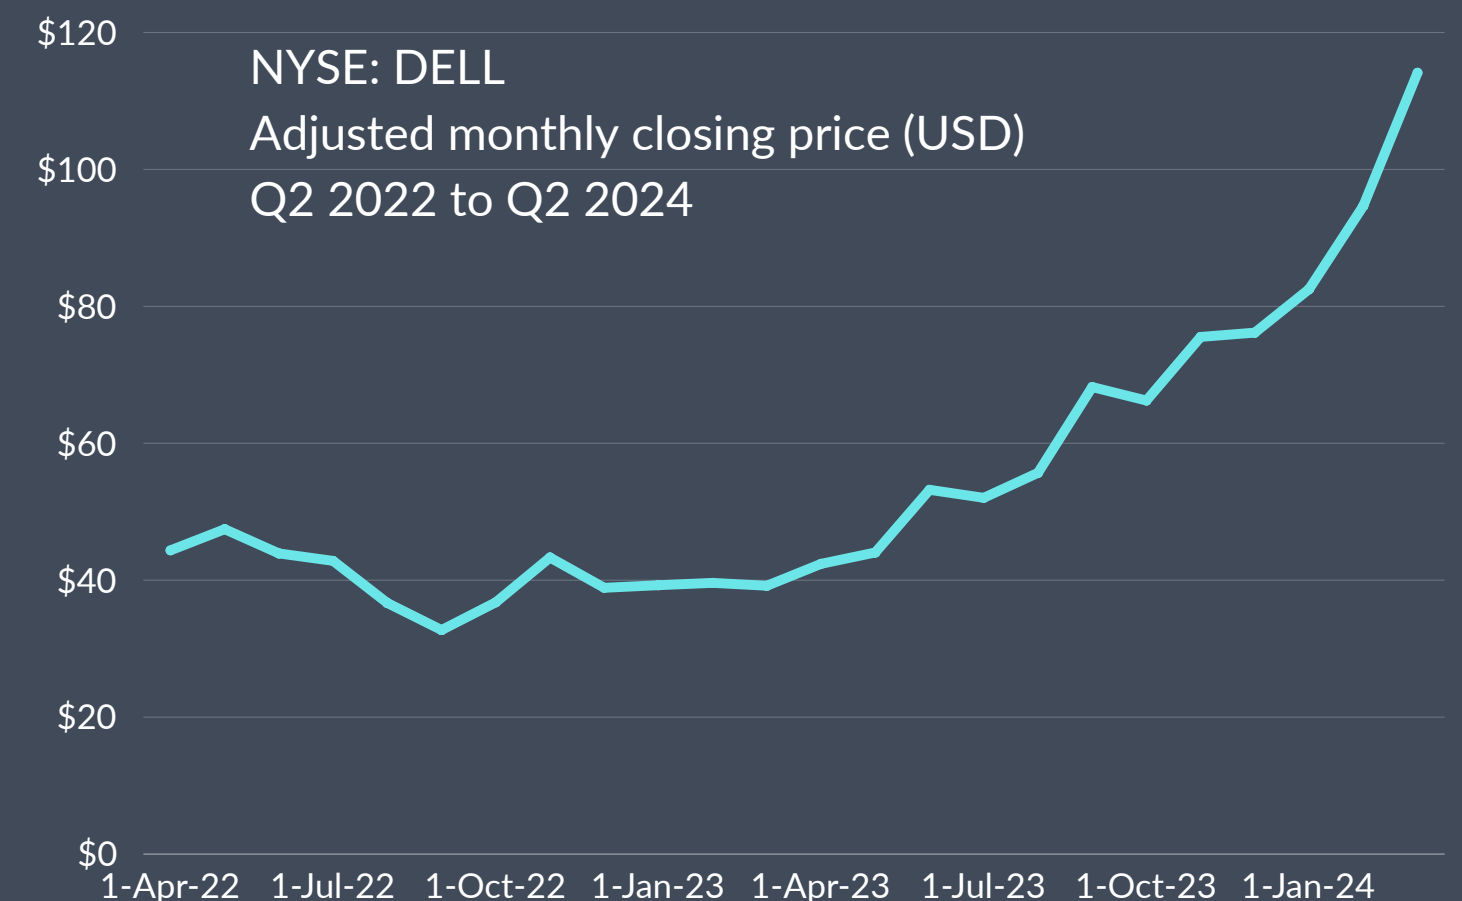

Contributions

1 Corporate strategy for Fortune 500 IT firm

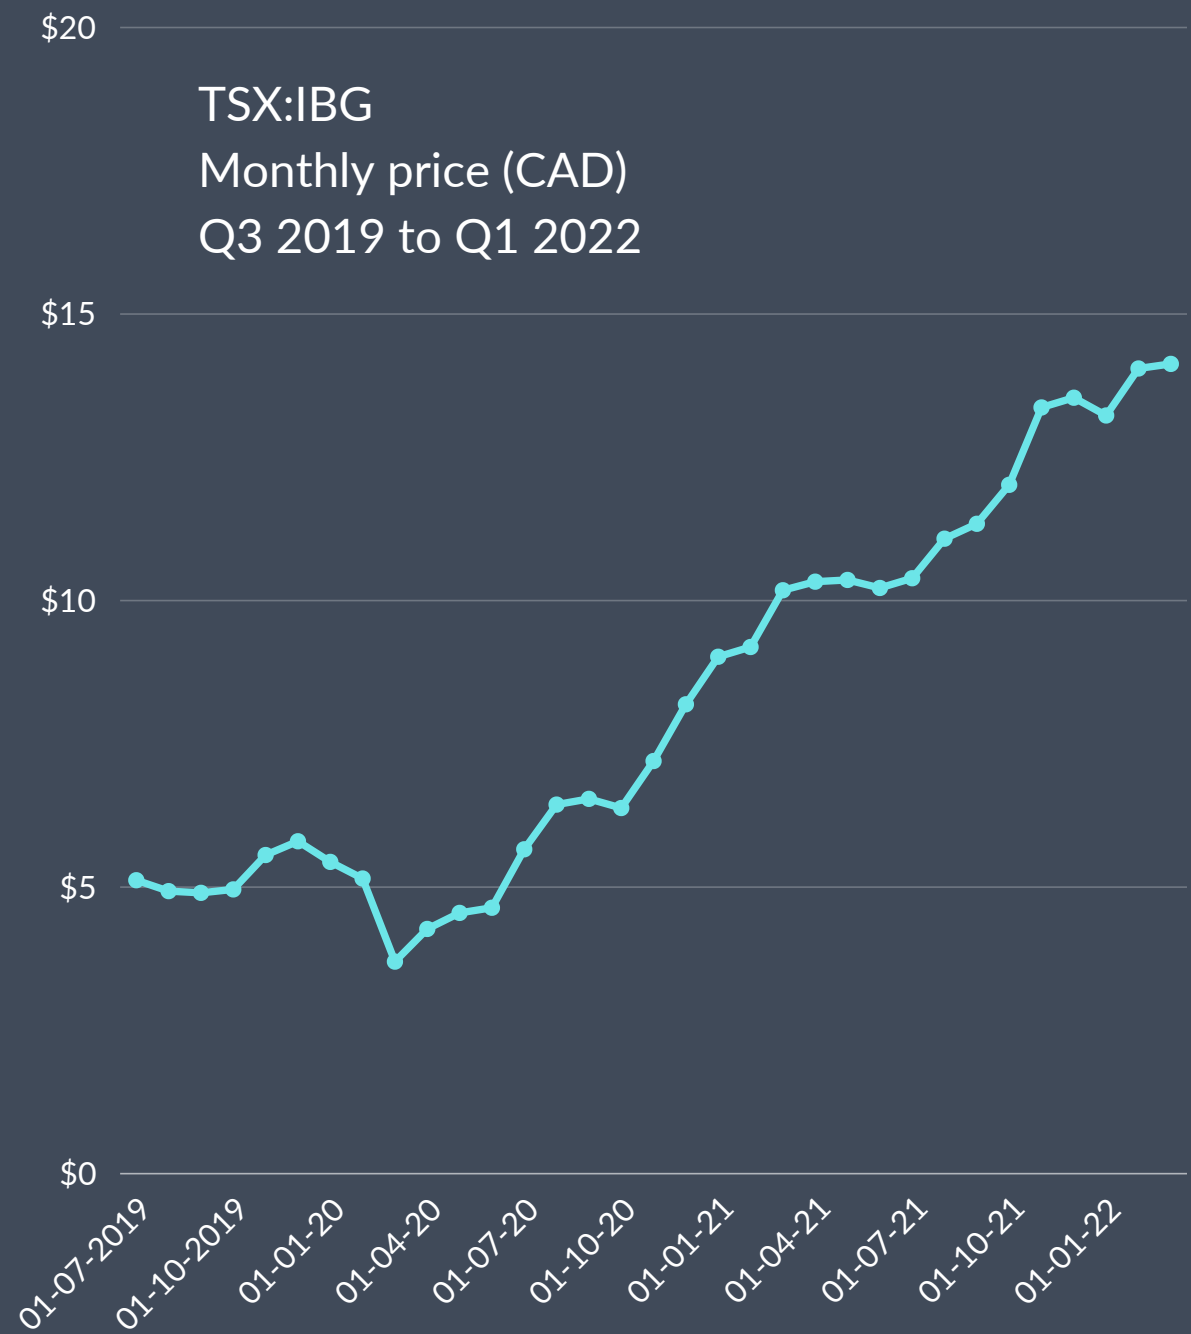

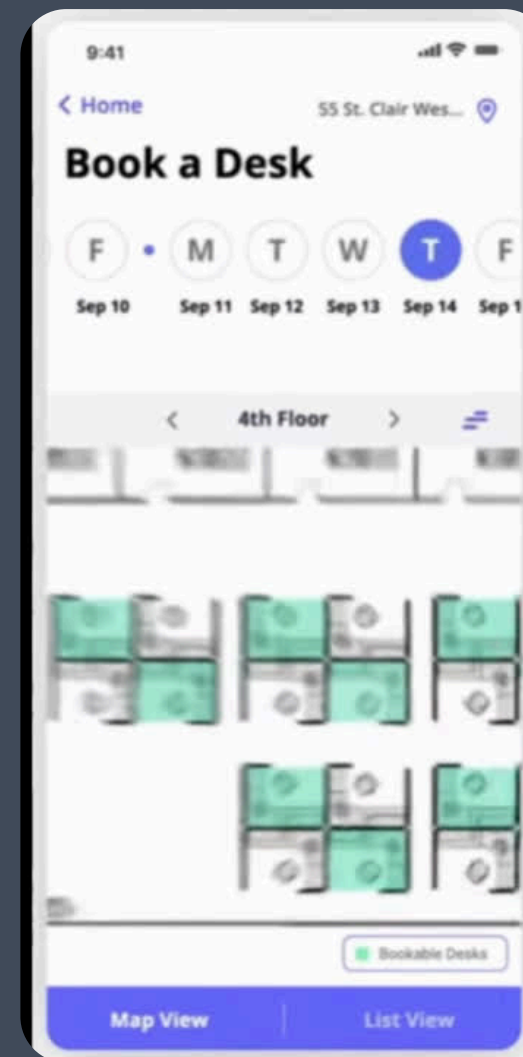

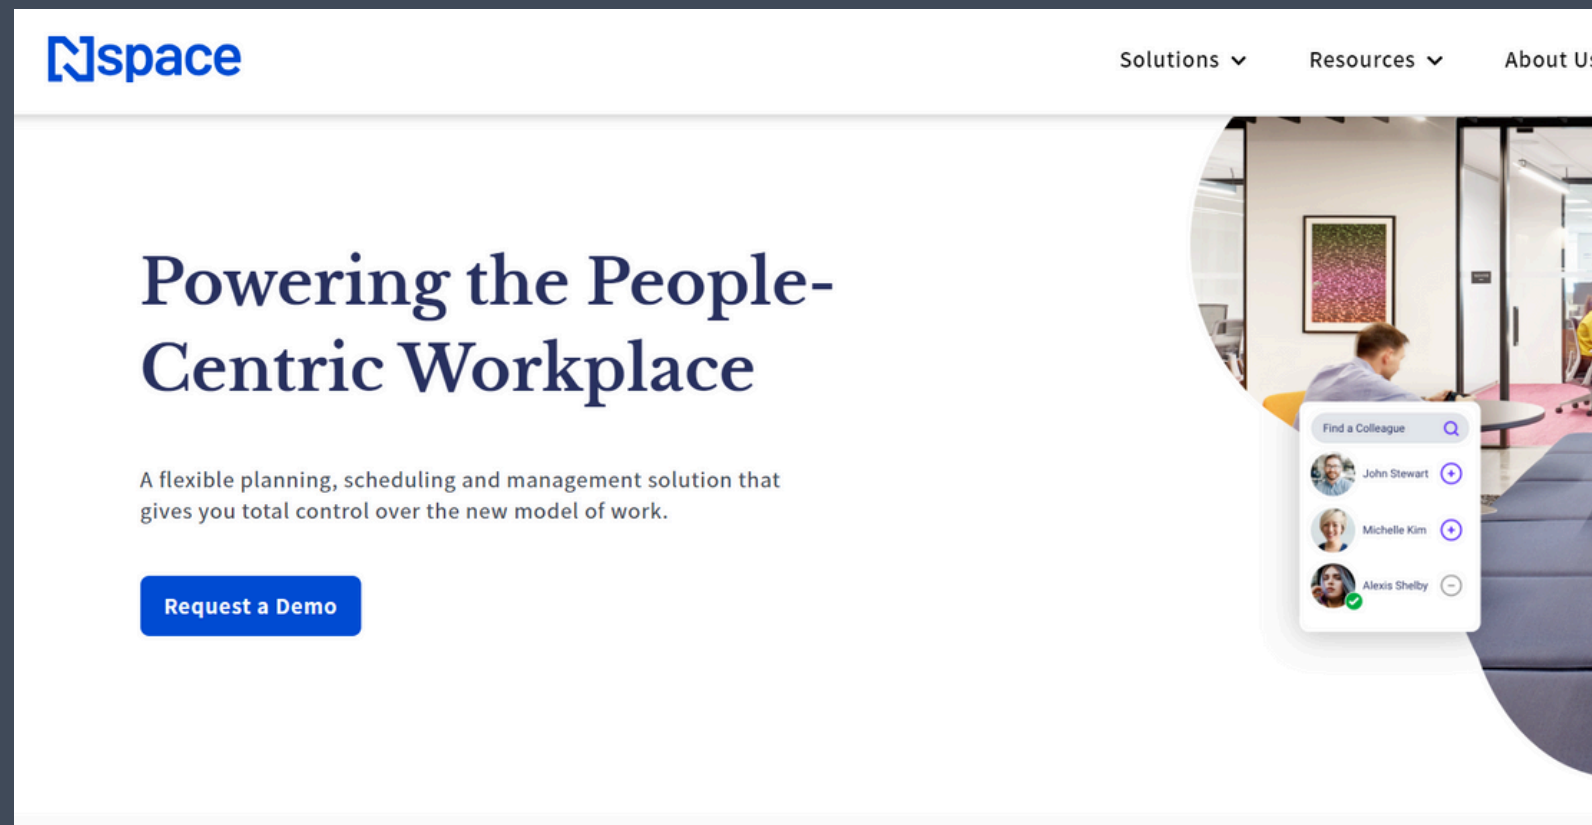

Led strategy projects and workstreams that uncovered USD billions in opportunity and won confidence of customers and investors

sources: Investor Presentation, Dell Technologies Securities Analyst Meeting, October 2023 , Yahoo Finance

2 Digital product launch for AEC firm

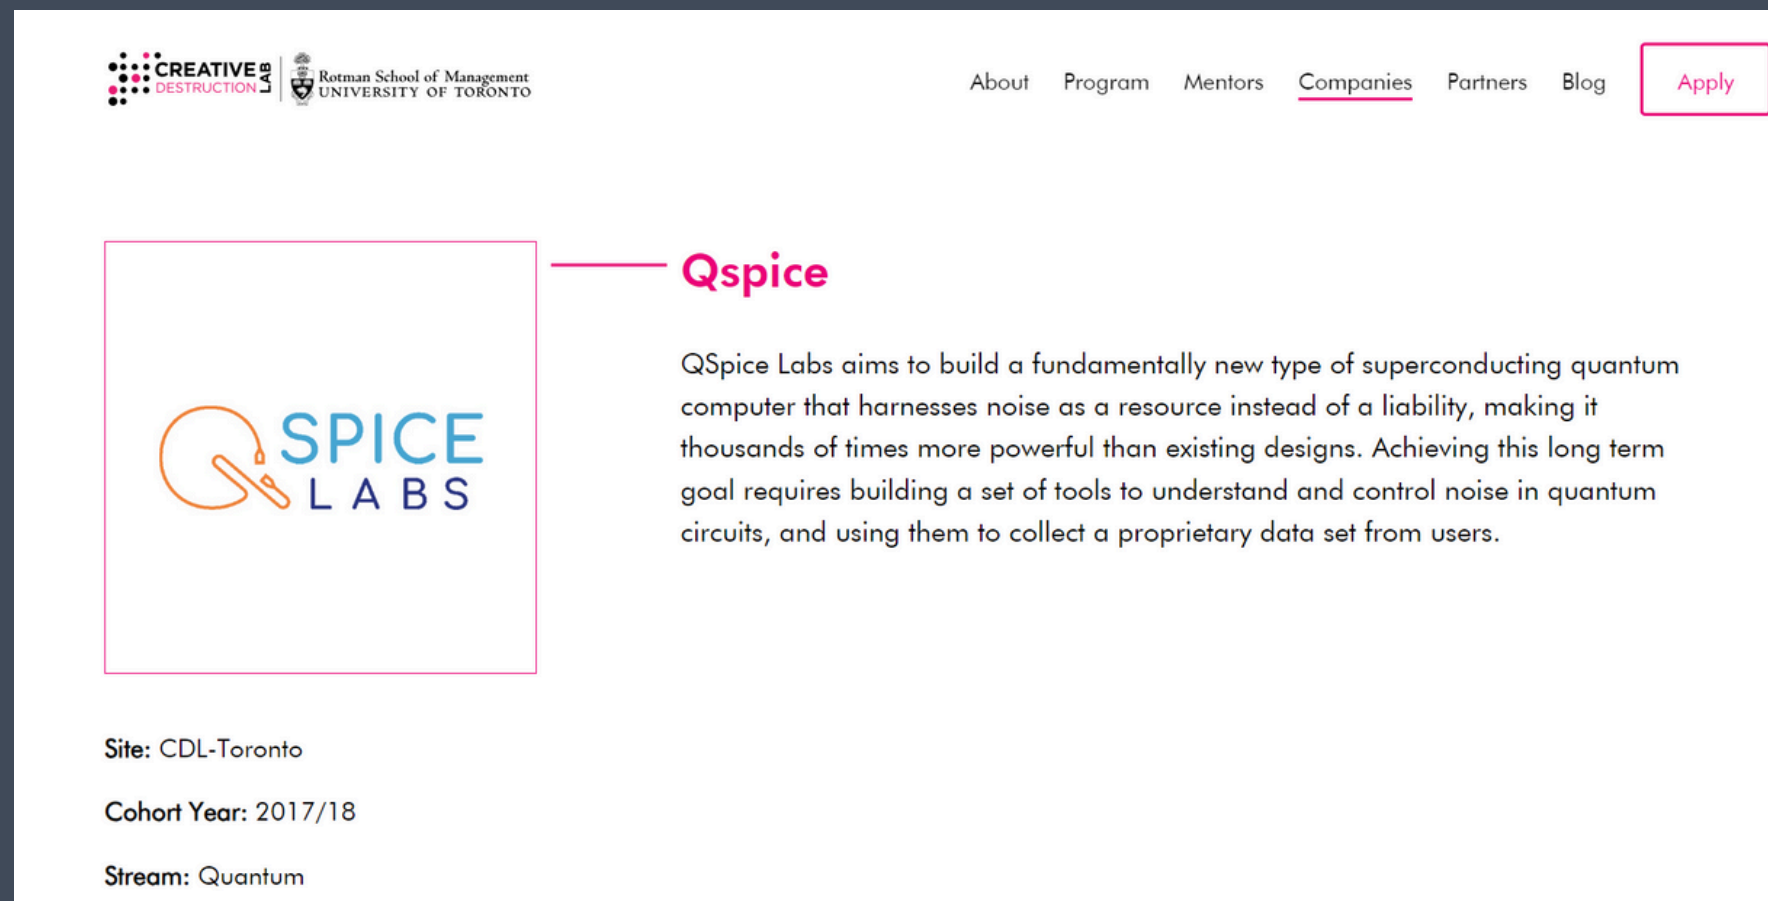

Spearheaded monetization of proptech IP as part of the overall digital transformation strategy.

sources: Wayback Machine, Verdantix.com, YouTube Nspace channel, investing.com

3 Business co-founder at quantum startup

Raised USD 200K in pre-seed funding and secured placement in globally recognized startup incubation programs

QSpice

QSpice Labs aims to build a fundamentally new type of superconducting quantum computer that harnesses noise as a resource instead of a liability, making it thousands of times more powerful than existing designs. Achieving this long term goal requires building a set of tools to understand and control noise in quantum circuits, and using them to collect a proprietary data set from users.

Site: CDL-Toronto
Cohort Year: 2017/18
Stream: Quantum

The Geometry of a Quantum Circuit and its Impact on Electromagnetic Noise

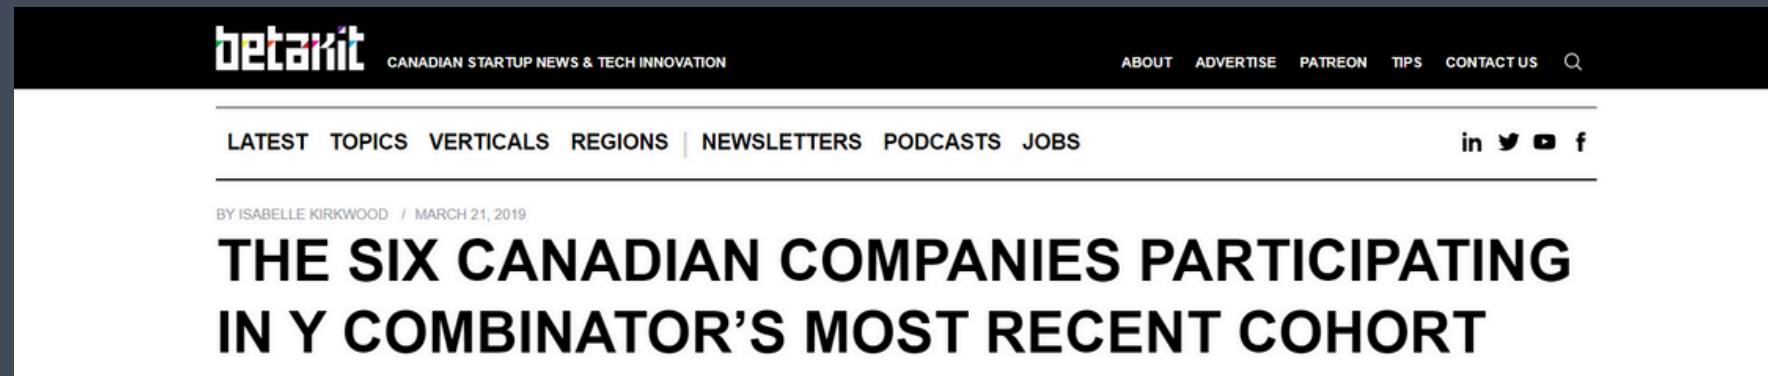

Raina J. Olsen^{1,2,*†}, Mohammadreza Rezaee², and Radhakrishnan Balu¹

What people say

“Jennifer is an individual who continuously builds bridges both inside the organization across functional boundaries as well as builds strong relationships in the community of her discipline. Jennifer has an incredible approach and way to deliver results and insights via her incredibly strong presentation and communication skills. Jennifer can present from CXO right through to individual contributor decision makers without compromise.

Jennifer is a delight to have in the office and as a key player on any team.”

Sean Seaton (former manager)

SVP, Group Devices & Partnerships
Deutsche Telekom (T-Mobile)

source: LinkedIn

What people say

“I highly value her strategic insights, action-oriented advice and willingness to spend time to explain and educate.

She has a remarkable ability to quantify technology trendlines and determine the optimal product and marketing actions an organization should take.

Her leadership abilities, strategic prowess and analytical capabilities are a rare combination of talent in the technology space..”

David Senf (former colleague)

Emerging Technologies & Trends - Security

Gartner

source: LinkedIn

What people say

“Jennifer’s research, analytical, and project management skills were critical in the product development process.

Jennifer was my manager and she was open to new ideas and feedback, always eager and willing to provide assistance, and a great listener – all necessary skills for a great manager.

I would highly recommend Jennifer and would be happy to work with her again in future.”

Bahar Norouzi (former report)

Manager, Product Operations
Telus Health
